CONTENTS.

PAPERS COMMUNICATED TO THE CHEMICAL SOCIETY.

PAGE

I.—The Oxidation of Sulphurous Acid to Dithionic Acid by Metallic Oxides. By H. C. H. Carpenter . . . 1

II.—The Production of hitherto unknown Metallic Borides. By Samuel Auchmuty Tucker, Ph.B., and Herbert R. Moody, B.S., M.A. 14

III.—The Constitution of the Acids obtained from α-Dibromocamphor. By Arthur Lapworth and Walter H. Lenton . 17

IV.—Note on the Reduction of Trinitrobenzene and Trinitrotoluene with Hydrogen Sulphide. By Julius B. Cohen and Henry D. Dakin 26

V.—The Synthesis of Alkyltricarballylic Acids. By William A. Bone and Charles H. G. Sprankling 29

VI.—The Bromination of Trimethylsuccinic Acid and the Interaction of Ethyl Bromotrimethylsuccinate and Ethyl Sodiocyanoacetate. By William A. Bone and Charles H. G. Sprankling 50

VII.—The Constituents of the Essential Oil of *Asarum canadense*. By Frederick B. Power and Frederic H. Lees . . 59

VIII.—Derivatives of Gallic Acid. By Frederick B. Power and Frank Shedden 73

IX.—Thiocarbamide Hydrochloride. By Henry P. Stevens, M.A., Ph.D. 79

X.—A Method for Determining Small Quantities of Carbonates. By Alfred Daniel Hall and Edward John Russell 81

XI.—Influence of Substitution on the Formation of Diazoamines and Aminoazo-compounds. By Gilbert Thomas Morgan, D.Sc. 86

XII.—Cyanohydroxypyridine Derivatives from Diacetonitrile. New Derivatives of ψ-Lutidostyril. By James Moir, M.A., B.Sc., 1851 Exhibition Scholar of Aberdeen University . 100

XIII.—The Determination of Available Plant Food in Soils by the use of Weak Acid Solvents. By Alfred Daniel Hall and Francis Joseph Plymen 117

XIV.—Corydaline. Part VII. The Constitution of Corydaline. By James J. Dobbie, M.A., D.Sc., and Alexander Lauder, B.Sc. 145

XV.—The Relationship of Corydaline to Berberine. Berberidic Acid. By James J. Dobbie, M.A., D.Sc., and Alexander Lauder, B.Sc. 157

13862

PAGE

XVI.—Studies in the Camphane Series. Part VI. Stereoisomeric Halogen Derivatives of α-Benzoylcamphor. By Martin Onslow Forster and Frances M. G. Micklethwait 160

XVII.—The Action of Phosphorus Thiocyanate on Alcohol. By Augustus Edward Dixon, M.D. 168

XVIII.—The Relationship between the Orientation of Substituents in and the Constitution of Benzeneazo-α-naphthol. By John Theodore Hewitt and Samuel James Manson Auld 171

XIX.—The Magnetic Rotation of some Polyhydric Alcohols, Hexoses, and Disaccharoses. By W. H. Perkin, sen., Ph.D., F.R.S. 177

XX.—The Constitution of Hydrocyanic, Cyanic, and Cyanuric Acids. By F. D. Chattaway and J. Mello Wadmore . 191

XXI.—Myricetin. Part II. By Arthur George Perkin, F.R.S.E. 203

XXII.—The Colouring Matters of Green Ebony. By Arthur George Perkin, F.R.S.E., and Samuel Henry Clifford Briggs, B.Sc. 210

XXIII.—On Brazilic Acid and the Constitution of Brazilin. By W. H. Perkin, jun. 221

XXIV.—Brazilin and Hæmatoxylin. Part III. The Constitution of Hæmatoxylin. By W. H. Perkin, jun., and J. Yates 235

XXV.—On αα-Dimethylglutaconic Acid and the Synthesis of isoCamphoronic Acid. By W. H. Perkin, jun. 246

XXVI.—Tetrazoline. Part II. By Siegfried Ruhemann and H. E. Stapleton 261

XXVII.—Studies in the Camphane Series. Part VII. Conversion of Hydroxycamphene into β-Halogen Derivatives of Camphor. By Martin Onslow Forster . . . 264

XXVIII.—Resolution of Trimethylhydrindonium Hydroxide into its Optically Active Components. By Frederic Stanley Kipping 275

XXIX.—The Action of Methylene Diiodide on Aryl- and Naphthyl-amines, Diarylmethylenediamines, Acridines, and Naphthacridines. By Alfred Senier and William Goodwin 280

XXX.—The Polymerisation of Cyanic Acid: Cyanuric Acid, and Cyamelide. By Alfred Senier and Thomas Walsh . 290

XXXI.—Magnetic Rotation of Ring Compounds. Camphor, Limonene, Carvene, Pinene, and some of their Derivatives. By W. H. Perkin, sen., Ph.D., F.R.S. 292

XXXII.—A Modification of Zeisel's Method for the Estimation of Methoxyl Groups. By J. T. Hewitt and T. S. Moore 318

PAGE

XXXIII.—The Radioactivity of Thorium Compounds. I. An Investigation of the Radioactive Emanation. By E. Rutherford, M.A., D.Sc., Macdonald Professor of Physics, and Frederick Soddy, B.A. (Oxon.), Demonstrator in Chemistry, McGill University, Montreal 321

XXXIV.—Solubilities of the Calcium Salts of the Acids of the Acetic Series. By John S. Lumsden, D.Sc., Ph.D. . . 350

XXXV.—The Equilibrium between a Solid and its Saturated Solution at Various Temperatures. By John S. Lumsden, D.Sc., Ph.D. 363

XXXVI.—Enzyme Action. By Adrian J. Brown . . . 373

XXXVII.—The Velocity of Hydrolysis of Starch by Diastase, with some Remarks on Enzyme Action. By Horace T. Brown, LL.D., F.R.S., and T. A. Glendinning, F.I.C. . 388

XXXVIII.—The Union of Hydrogen and Oxygen. By H. Brereton Baker, M.A. 400

XXXIX.—Studies in the Camphane Series. Part VIII. *m*-Nitrobenzoylcamphor. By Martin Onslow Forster and Frances M. G. Micklethwait 406

XL.—On the Union of Hydrogen and Chlorine. Part IV. The Draper Effect. By J. W. Mellor and W. R. Anderson 414

XLI.—Condensation of Phenols with Esters of Unsaturated Acids. Part VII. By Siegfried Ruhemann . . . 419

XLII.—Mesoxalic Semi-Aldehyde. By Henry John Horstman Fenton, F.R.S., and John Henry Ryffel, B.A., B.Sc. 426

XLIII.—The Picriminothiocarbonic Esters. By James Codrington Crocker, B.A., Scholar of St. John's College, Cambridge 436

XLIV.—Isomeric Additive Compounds of Dibenzyl Ketone and Deoxybenzoin with Benzylidene-*p*-toluidine, *m*-Nitrobenzylideneaniline, and Benzylidene-*m*-nitraniline. Part III. By Francis E. Francis, B.Sc., Ph.D. . . . 441

XLV.—The Bases contained in Scottish Shale Oil. Part I. By Frederic Charles Garrett and John Armstrong Smythe 449

XLVI.—The Transport Number of very Dilute Solutions. By B. D. Steele, B.Sc., and R. B. Denison, B.Sc. (1851 Exhibition Scholars) 456

XLVII.—Rhamnazin and Rhamnetin. By Arthur George Perkin, F.R.S.E., and John Raymond Allison, B.Sc. . . 469

XLVIII.—Robinin, Violaquercetin, Myrticolorin, and Osyritrin. By Arthur George Perkin, F.R.S.E. 473

PAGE

XLIX.—The Influence of Salts and other Substances on the Vapour Pressure of Aqueous Ammonia Solution. By Edgar Philip Perman 480

L.—The Nitration of *s*-Trihalogen Anilines. By K. J. P. Orton. 490

LI.—Some *s*-Chlorobromonitroanilines and their Derivatives. By K. J. P. Orton 495

LII.—The Nitration of *s*-Trihalogen Acetanilides. By K. J. P. Orton 500

LIII.—Preparation of Sulphamide from Ammonium Amidosulphite. By Edward Divers and Masataka Ogawa . . 504

LIV.—The Constitution of Limettin. By W. A. Tilden and H. Burrows 508

LV.—A Method of Determining the Ratio of Distribution of a Base between Two Acids. By H. M. Dawson and F. E. Grant 512

LVI.—The Molecular Complexity of Acetic Acid in Chloroform Solution. By H. M. Dawson 521

LVII.—The Existence of Polyiodides in Nitrobenzene Solution. I. By H. M. Dawson and R. Gawler 524

LVIII.—The Slow Oxidation of Methane at Low Temperatures. By William A. Bone and Richard V. Wheeler . . 535

LIX.—Derivatives of α-Aminocamphoroxime. By Arthur Lapworth and Alfred William Harvey 549

LX.—The Absorption Spectra of Metallic Nitrates. By Walter Noel Hartley, D.Sc., F.R.S. 556

LXI.—The Resolution of Pheno-α-aminocycloheptane into its Optical Isomerides. Tartrates of Pheno-α-aminocycloheptane and of Hydrindamine. By Frederic S. Kipping and Albert Edward Hunter 574

LXII.—Colouring Matter from the Flowers of *Delphinium Consolida*. By Arthur George Perkin, F.R.S.E., and Edward John Wilkinson : 585

LXIII.—Synthesis of Imino-ethers. *N*-Aryl Benzimino-ethers. By G. D. Lander 591

LXIV.—Polymerisation Products from Diazoacetic Acid. By Oswald Silberrad, Ph.D. 598

Annual General Meeting 609

Obituary Notices 625

LXV.—Nitrogen Chlorides containing the Propionyl Group. By F. D. Chattaway 637

LXVI.—Dimercurammonium Nitrite and its Haloid Derivatives. By Prafulla Chandra Rây, D.Sc. (Edin.) 644

LXVII.—Influence of Substitution on the Reactivity of the Aromatic *m*-Diamines. By Gilbert Thomas Morgan, D.Sc. 650

PAGE

LXVIII.—The Influence of Certain Acidic Oxides on the Specific Rotations of Lactic Acid and Potassium Lactate. By GEORGE GERALD HENDERSON and DAVID PRENTICE, Ph.D. 658

LXIX.—Oxonium Salts of Fluoran and its Derivatives. By J. T. HEWITT and J. N. TERVET 663

LXX.—Action of Hydrogen Peroxide on Carbohydrates in the Presence of Ferrous Sulphate. III. By ROBERT SELBY MORRELL and JAMES MURRAY CROFTS 666

LXXI.—Preparation and Properties of 4-isoPropyldihydroresorcin. By ARTHUR WILLIAM CROSSLEY 675

LXXII.—The Influence of Temperature on Association in Benzene Solution, and the Value of the Molecular Rise of Boiling Point for Benzene at Different Temperatures. By WILLIAM ROSS INNES, M.Sc. (Vict.), Ph.D. (Heidelberg) . 682

LXXIII.—The Preparation of Absolute Alcohol from Strong Spirit. By SYDNEY YOUNG, D.Sc., F.R.S. 707

LXXIV.—The Properties of Mixtures of the Lower Alcohols with Water. By SYDNEY YOUNG, D.Sc., F.R.S., and EMILY C. FORTEY, B.Sc. 717

LXXV.—The Properties of Mixtures of the Lower Alcohols with Benzene and with Benzene and Water. By SYDNEY YOUNG, D.Sc., F.R.S., and EMILY C. FORTEY, B.Sc. . . 739

LXXVI.—Fractional Distillation as a Method of Quantitative Analysis. By SYDNEY YOUNG, D.Sc., F.R.S., and EMILY C. FORTEY, B.Sc. 752

LXXVII.—The Vapour Pressures and Boiling Points of Mixed Liquids. Part I. By SYDNEY YOUNG, D.Sc., F.R.S. . . 768

LXXVIII.—Correction of the Boiling Points of Liquids from Observed to Normal Pressure. By SYDNEY YOUNG, D.Sc., F.R.S. 777

LXXIX.—Vapour Pressures and Specific Volumes of isoPropyl isoButyrate. By SYDNEY YOUNG, D.Sc., F.R.S., and EMILY C. FORTEY, B.Sc. 783

LXXX.—Influence of the Methyl Group on Ring Formation. By A. W. GILBODY and C. H. G. SPRANKLING . . . 787

LXXXI.—The Preparation of Highly Substituted Nitroaminobenzenes. By K. J. P. ORTON 806

LXXXII.—Nitrogen Bromides containing the Propionyl Group. By F. D. CHATTAWAY 814

LXXXIII.—Substituted Dihydrobenzenes. Part I. $\Delta^{2:4}$-Dimethyldihydrobenzene. By ARTHUR WILLIAM CROSSLEY and HENRY RONDEL LE SUEUR 821

PAGE

LXXXIV.—The Radioactivity of Thorium Compounds. II. The Cause and Nature of Radioactivity. By E. Rutherford and Frederick Soddy 837

LXXXV.—The Radioactivity of Uranium. By Frederick Soddy 860

LXXXVI.—Studies in the Camphane Series. Part IX. Comparison of Bromonitrocamphane with Bromonitrocamphor. By Martin Onslow Forster 865

LXXXVII.—2 : 4-Dibromo-5-nitro- and 2 : 4-Dibromo-3 : 5-dinitrotoluenes and their Behaviour on Reduction. By William A. Davis 870

LXXXVIII.—Taxine. By T. E. Thorpe, C.B., F.R.S., and George Stubbs 874

LXXXIX.—The Sampling of Soils. By John Walter Leather. 883

XC.—Some Excessively Saline Indian Well Waters. By John Walter Leather 887

XCI.—Bromonitro-derivatives of Fluorescein. By J. T. Hewitt and Alfred William George Woodforde 893

XCII.—Studies in the Tetrahydronaphthalene Series. I. The Diazoamino-compounds of *ar*-Tetrahydro-*β*-naphthalene. By Clarence Smith, B.Sc., A.R.C.S. 900

XCIII.—The Variation with Temperature of the Surface Energies and Densities of Liquid Oxygen, Nitrogen, Argon, and Carbon Monoxide. By E. C. C. Baly and F. G. Donnan 907

XCIV.—Phosphorus Tetroxide. By Charles A. West, B.Sc., A.R.C.S. 923

XCV.—The Absorption Spectra of Phloroglucinol and some of its Derivatives. By W. N. Hartley, D.Sc., F.R.S., James J. Dobbie, D.Sc., M.A., and Alexander Lauder, B.Sc. . . 929

XCVI.—The Colour Changes exhibited by the Chlorides of Cobalt and some other Metals, from the Standpoint of the Theory of Electroaffinity. By Frederick G. Donnan and Henry Bassett, jun., [and, in part, C. J. J. Fox] 939

XCVII.—Isomeric Additive Products of Methyl, Ethyl, and Propyl Benzyl Ketones with Benzylideneaniline. Part IV. By Francis E. Francis, B.Sc., Ph.D., and Ernest Bowman Ludlam, B.Sc. 956

XCVIII.—The Stereochemical Formulæ of Benzene. By James E. Marsh 961

XCIX.—The Action of Chlorine and Bromine on Nitroaminobenzenes. Part I. *s*-Trisubstituted Chloronitroaminobenzenes. By K. J. P. Orton 965

Raoult Memorial Lecture. By J. H. van't Hoff, Member of the Prussian Academy of Science, and Professor in the University of Berlin 969

PAGE

C.—Substituted Nitrogen Chlorides containing the Azo-group. By F. D. CHATTAWAY 982

CI.—Nitrogen Chlorides and Bromides derived from Ortho-substituted Anilides. By F. D. CHATTAWAY and J. MELLO WADMORE 984

CII.—Elimination of a Nitro-group on Diazotisation. Dinitro-*p*-Anisidine and Derivatives. By RAPHAEL MELDOLA, F.R.S., and JOHN VARGAS EYRE 988

CIII.—Tribromophenol Bromide (Dibromobenzene Ketodibromide. By EDWARD W. LEWIS (Salters' Research Fellow) . 1001

CIV.—Some Hydroxypyrone Derivatives. By T. TICKLE (former Salters' Company's Research Fellow in the Research Laboratory of the Pharmaceutical Society of Great Britain) and J. NORMAN COLLIE, F.R.S. 1004

CV.—Brazilin and Hæmatoxylin. Part IV. On Dimethoxycarboxybenzoylformic Acid, Brazilinic Acid, &c. By W. H. PERKIN, jun. 1008

CVI.—Brazilin and Hæmatoxylin. Part V. The Oxidation of Trimethylbrazilin with Chromic Acid. By A. W. GILBODY and W. H. PERKIN, jun. 1040

CVII.—Brazilin and Hæmatoxylin. Part VI. The Oxidation of Tetramethylhæmatoxylin with Chromic Acid. By W. H. PERKIN, jun. 1057

CVIII.—The Decomposition of Chlorates. Part V. Potassium Chlorate in presence of Oxides of Manganese, and the Theory of Perchlorate Formation. By WILLIAM H. SODEAU, B.Sc. 1066

CIX.—An Accurate Method of Measuring the Compressibilities of Vapours. By B. D. STEELE, D.Sc. (1851 Exhibition Scholar) 1076

CX.—The Solvent Properties of Mixed Liquids in Relation to the Chemical Characters and Solvent Properties of their Components. By HARRY MEDFORTH DAWSON . . . 1086

CXI.—The Influence of Solvents on the Rotation of Optically Active Compounds. Part III. Influence of Benzene, Toluene, *o*-Xylene, *m*-Xylene, *p*-Xylene, and Mesitylene on the Rotation of Ethyl Tartrate. By T. S. PATTERSON . 1097

CXII.—The Influence of Solvents on the Rotation of Optically Active Compounds. Part IV. Influence of Naphthalene on the Rotation of Ethyl Tartrate. By T. S. PATTERSON . 1134

CXIII.—The Decomposition of Oxalacetic Acid Phenylhydrazone in Aqueous and Acid Solutions, and a New Method of Determining the Concentration of Hydrogen Ions. By HUMPHREY OWEN JONES, B.A., B.Sc., Jacksonian Demonstrator in the University of Cambridge, and OWEN WILLANS RICHARDSON, B.A., B.Sc., Coutts Trotter Student of Trinity College, Cambridge 1140

PAGE

CXIV.—The Dissociation Constants of Oxalacetic Acid and its Phenylhydrazone. By HUMPHREY OWEN JONES, B.A., B.Sc., Jacksonian Demonstrator in the University of Cambridge, and OWEN WILLANS RICHARDSON, B.A., B.Sc., Coutts Trotter Student, Trinity College, Cambridge 1158

CXV.—Constituents of *Acacia* and *Gambier Catechus*. Part I. By ARTHUR GEORGE PERKIN, F.R.S.E., and E. YOSHITAKE . 1160

CXVI.—Notes on Luteolin and Apigenin. By ARTHUR GEORGE PERKIN, F.R.S.E. 1174

CXVII.—The Action of Ungerminated Barley Diastase on Starch. Part I. By JULIAN LEVETT BAKER . . . 1177

CXVIII.—The Preparation of Mixed Ketones by Heating the Mixed Calcium Salts of Organic Acids. By ERNEST BOWMAN LUDLAM, B.Sc. (Vict.) 1185

CXIX.—A Simple form of Landsberger's Apparatus for Determining the Boiling Points of Solutions. By ERNEST BOWMAN LUDLAM, M.Sc. 1193

CXX.—The Action of Substituting Agents on Benzeneazo-β-naphthol. By J. T. HEWITT and S. J. M. AULD . . . 1202

CXXI.—The Condensation of Dimethylaminobenzaldehyde with β-Naphthol. By JOHN THEODORE HEWITT, ALFRED JOHN TURNER, B.Sc., and SIDNEY WALLACE BRADLEY . . . 1207

CXXII.—The Action of Ethyl Chlorofumarate on Monoalkylmalonic Esters. By SIEGFRIED RUHEMANN . . . 1212

CXXIII.—The Solubility of Mannitol, Picric Acid, and Anthracene. By ALEXANDER FINDLAY 1217

CXXIV.—Di-sec.-Octyl Tartrate and Di-sec.-Octyl Dibenzoyltartrate. By JOHN MCCRAE 1221

CXXV.—Glycogen from Yeast. By ARTHUR HARDEN and W. J. YOUNG 1224

CXXVI.—Atomic and Molecular Heats of Fusion. By P. W. ROBERTSON 1233

CXXVII.—Revision of the Atomic Weight of Lanthanum. By BOHUSLAV BRAUNER, Ph.D., and FRANTIŠEK PAVLÍČEK, Bohemian University, Prague. (Communicated by Professor Bohuslav Brauner) 1243

CXXVIII.—The Action of Acetylene on the Acetates of Mercury. By EMIL BURKARD, Ph.D., and MORRIS W. TRAVERS, D.Sc. 1270

CXXIX.—The Preparation of Pure Chlorine and its Behaviour towards Hydrogen. By J. W. MELLOR and EDWARD JOHN RUSSELL 1272

CXXX.—The Union of Hydrogen and Chlorine. V. The Action of Light on Chlorine Gas. By J. W. MELLOR . . 1280

PAGE

CXXXI.—The Union of Hydrogen and Chlorine. VI. The Period of Induction. By J. W. Mellor 1292

CXXXII.—The Decomposition of Water Vapour by the Electric Spark. By D. L. Chapman and F. Austin Lidbury . . 1301

CXXXIII.—Derivatives of Dibenzoylmesitylene. By William Hobson Mills, Fellow of Jesus College, Cambridge, and Thomas Hill Easterfield 1311

CXXXIV.—The Chlorination of the Dichlorotoluenes in Presence of the Aluminium-Mercury Couple. The Constitution of the Trichlorotoluenes. By Julius B. Cohen and Henry D. Dakin 1324

CXXXV.—The Constitution of the Nitro- and Dinitro-derivatives of the Dichlorotoluenes. By Julius B. Cohen and Henry D. Dakin, The Yorkshire College 1344

CXXXVI.—Iodonium Compounds of the Type IR′R″R‴ and the Configuration of the Iodine Atom. By Harold Peters, A.I.C. 1350

CXXXVII.—The Molecular Configuration of Phosphoryl Chloride and its Derivatives. By Robert Martin Caven, D.Sc., F.I.C. 1362

CXXXVIII.—Influence of Substitution on the Formation of Diazoamines and Aminoazo-Compounds. Part II. By Gilbert Thomas Morgan, D.Sc., [and, in part, with George M. Norman] 1376

CXXXIX.—Observations on the Phenomena and Products of Decomposition when Normal Cupric Acetate is Heated. By Andrea Angel, B.A., Dixon Scholar, and A. Vernon Harcourt, M.A., F.R.S., Lee's Reader in Chemistry, of Christ Church, Oxford 1385

CXL.—The Resolution of β-Hydroxybutyric Acid into its Optically Active Components. By Alex. McKenzie . 1402

CXLI.—The Rate of Decomposition of Diazo-compounds. Part I. Diazo-compounds of the Benzene Series. By John Cannell Cain and Frank Nicoll 1412

CXLII.—Studies of the Terpenes and Allied Compounds. Sulphonic Derivatives of Camphor. I. Camphorsulphonic Acid (Reychler): the Formation of Anhydramides. By Henry E. Armstrong and T. Martin Lowry 1441

CXLIII.—Studies of the Terpenes and Allied Compounds. The Sulphonation of Camphor. II. β-Bromocamphor and its Derivatives. β-Bromocamphoric Acid. By Henry E. Armstrong and T. Martin Lowry 1462

CXLIV.—Studies of the Terpenes and Allied Compounds. The Sulphonation of Camphor. III. The Optical Inversion of Camphor and the Mechanism of Hetero- and Meso-sulphonation, of Homo- and Hetero-bromination, and of Dehydration. By Henry E. Armstrong and T. Martin Lowry . 1469

PAGE

CXLV.—The Action of Nitric Acid on Bromophenolic Compounds. By WILLIAM ROBERTSON, A.R.C.S. . . . 1475

CXLVI.—Derivatives of Normal- and iso-Butyrylpyruvic Acids. By ARTHUR LAPWORTH and A. C. OSBORN HANN . . . 1485

CXLVII.—Optically Active Esters of β-Ketonic and β-Aldehydic Acids. Part I. Menthyl Formylphenylacetate. By ARTHUR LAPWORTH and A. C. OSBORN HANN . . . 1491

CXLVIII.—Optically Active Esters of β-Ketonic and β-Aldehydic Acids. Part II. Menthyl Acetoacetate. By A. LAPWORTH and A. C. OSBORN HANN 1499

CXLIX.—The Mutarotation of Camphorquinonehydrazone and Mechanism of Simple Desmotropic Change. By ARTHUR LAPWORTH and A. C. OSBORN HANN 1508

CL.—The Action of Sodamide and Acyl-substituted Sodamides on Organic Esters. By ARTHUR WALSH TITHERLEY, D.Sc., Ph.D. 1520

CLI.—3 : 5-Dichloro-*o*-xylene and 3 : 5-Dichloro-*o*-phthalic Acid. By ARTHUR WILLIAM CROSSLEY and HENRY RONDEL LE SUEUR 1533

CLII.—Non-existence of the Gaseous Sulphide of Carbon described by Deninger. By EDWARD JOHN RUSSELL and NORMAN SMITH 1538

CLIII.—Note on the Localisation of Phosphates in the Sugar Cane. By CHAS. HENRY GRAHAM SPRANKLING . . . 1543

CLIV.—Isometric Anhydrous Sulphates of the Form $M''SO_4,R'_2SO_4$. By FREDERIC R. MALLET 1546

CLV.—Asymmetric Optically Active Selenium Compounds and the Sexavalency of Selenium and Sulphur. *d*- and *l*-Phenylmethylselenetine Salts. By WILLIAM JACKSON POPE, F.R.S., and ALLEN NEVILLE, B.Sc. 1552

CLVI.—Hydroxyoxamides. Part II. By ROBERT HOWSON PICKARD, CHARLES ALLEN, WILLIAM AUDLEY BOWDLER and WILLIAM CARTER 1563

CLVII.—The Constituents of Commercial Chrysarobin. By HOOPER ALBERT DICKINSON JOWETT and CHARLES ETTY POTTER 1575

CLVIII.—The Constituents of an Essential Oil of Rue. By FREDERICK B. POWER and FREDERIC H. LEES . . . 1585

CLIX.—Methyl β-Methylhexyl Ketone. By FREDERIC HERBERT LEES 1594

CLX.—The Constitution of the Metallic Cyanides as Deduced from their Synthetic Interactions. The Constitution of Hydrogen Cyanide. By JOHN WADE, D.Sc. . . . 1596
